SUMMARY

Computer Science Engineering student with a 9.76 CGPA and strong foundations in programming, problem solving, and full-stack development. Skilled in TypeScript, JavaScript, C, and backend development, with experience building technically challenging systems including a chess engine with advanced search optimization and practical web applications. Passionate about software engineering, scalable systems, and building projects with real technical depth.

EDUCATION

Arya College of Engineering, Jaipur
B.Tech, Computer Science Engineering

2024 – 2028

A's Steward Morris School, Jaipur
Class XII: 81.2% | Class X: 87.4%

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C, C++, Python, Java, HTML/CSS

Web & Backend: Node.js, Express.js, React.js, REST APIs, EJS

Databases: MongoDB, MySQL

Tools & Technologies: Git, GitHub, VS Code, Postman, npm, Chrome DevTools, Netlify

Core Concepts: Data Structures & Algorithms, OOP, Problem Solving, Backend Development

PROJECTS

BitBoardTS — TypeScript Chess Engine

Jan 2026

TypeScript, Node.js, Web Workers, UCI Protocol | github.com/aryanjhanwar/BitBoardTS

- Engineered a complete chess engine using split-32 bitboard representation and magic bitboard move generation for optimized board computation.
- Implemented iterative deepening alpha-beta search with advanced optimizations including null-move pruning, Late Move Reductions (LMR), Principal Variation Search (PVS), and transposition tables.
- Designed a tapered evaluation function for dynamic positional assessment across opening, middlegame, and endgame phases.
- Built support for Node.js runtime and Web Worker execution with UCI protocol compatibility, achieving approximately 2000–2200 ELO strength.

Syllabus AI — Visual Learning Roadmap Generator

March 2026

JavaScript, PDF Processing, Graph Visualization | github.com/aryanjhanwar/syllabusAi

- Developed a platform that accepts syllabus PDFs and converts topics into graphical learning roadmaps for structured self-learning.
- Built a node-based concept mapping system connecting related topics and visualizing learning dependencies.
- Designed a step-by-step concept flow enabling users to understand prerequisite relationships and progression paths.
- Created an intuitive visual interface to simplify syllabus navigation and concept discovery.

Short URL Generator

Nov 2025

Node.js, Express.js, EJS, JavaScript | github.com/aryanjhanwar/short-url-nodejs

- Developed a full-stack URL shortening application for generating compact, shareable links with server-side rendering using EJS templates.
- Built backend request routing and URL redirection logic using Express.js for efficient navigation.
- Implemented reusable backend architecture for simplified URL management and scalability.

- Structured project using modular routing and clean backend organization.

INTERNSHIPS

IBM SkillBuild Training

July 2025

- Gained hands-on exposure to collaborative software development and technical problem solving.
- Built development projects and strengthened practical implementation skills in software engineering.

CERTIFICATIONS

- NPTEL Programming in Java — 95% (Elite + Gold Medal)
- NPTEL C Programming — Silver Medal (Top 2%)
- NPTEL Modern C++ Programming — Elite (Top 5%)
- NPTEL Data Structures & Design — Silver Medal (Top 5%)
- IIT Bombay Spoken Tutorial — C Programming
- ISRO–IIRS Outreach Programme

ACHIEVEMENTS

- 9.76 CGPA in B.Tech Computer Science Engineering
- Multiple NPTEL Elite & Medal Certifications from IITs
- UCMAS National Rank: 1022 | International Rank: 3231
